

Organisational divisions typically have different roles in B-BBEE compliance management. Mpowered's software solutions help to break down the silos between the various functions and integrate data from various source systems into a single software solution. This enables them to easily manage the level of visibility needed to ensure transformation is being continually and effectively driven throughout a company, as well as leverage masses of B-BBEE derived data to deliver critical business insights.

Our Vision

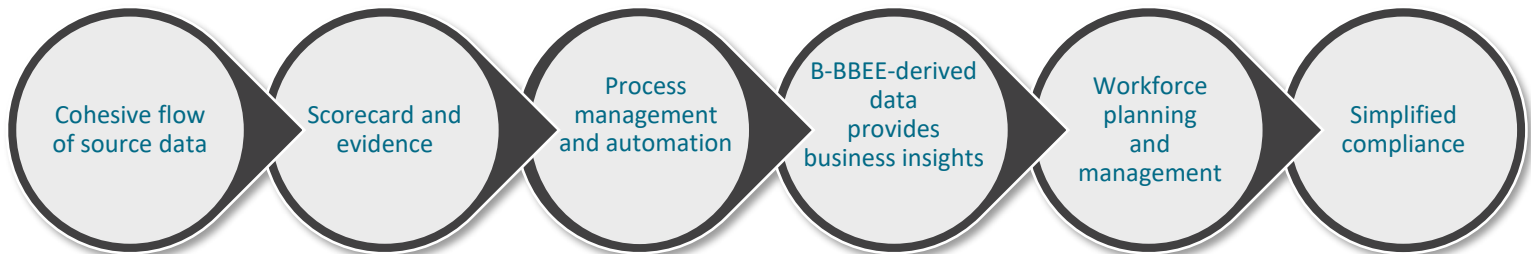

We seek to empower South African organisations who are on their transformation journey, through the simplification and digitisation of B-BBEE Compliance.

Client

Companies of all sizes, looking for a software solutions with the features, functions and insights for them to proactively manage the B-BBEE compliance process.

Our Approach

We offer B-BBEE compliance management software that aids organisations in solving the critical challenge of alignment and consistency of B-BBEE interpretation. Our software solution enables a seamless flow of data, information, scorecards and evidence - throughout the compliance process, up to verification. This allows organisations to easily manage the level of visibility needed to ensure transformation is being continually and effectively driven throughout a company, as well as leverage masses of B-BBEE derived data, to deliver critical business insights.
