

In an increasingly complex commercial and policy environment, economic thinking and advice can provide a clear, logical framework for project- or programme-level decision-making. Having a deep understanding of the Southern African business, policy and socio-economic contexts, as well as extensive experience with project impact evaluation, will assist your team in delivering real impact effectively and efficiently.

Our Vision

Assist organisations to solve complex problems through the systematic and independent measurement of project performance.

Client

Monitoring and evaluation (M&E) services have been rendered to the private sector, foundations, donors, non-profits and government looking for systematic and independent measurement of project performance. Delivering evaluations that can stand up to external scrutiny, are objective, and provide the insight needed for clients to assess project progress and improve their interventions to maximise impact.

Our Approach

- Tailor-made strategic objectives to meet clients specific needs.
- Improving project performance, outcomes and impact, as well as informing policy and investment decisions and embedded institutional learning.
- Typically applying a theory-based approach using a combination of quantitative and qualitative methods, that which enable data triangulation to strengthen the validity of study findings.

“This service is offered as a standalone or a value-add to other offerings, where applicable and of adequate scope”

MONITORING

- Development of M&E frameworks and systems
- Programme and indicator design
- Data quality audits (DQAs)
- Compilation and refinement of Logframe and Theory of Change models

EVALUATION AND RESEARCH

- Formative and baseline evaluations
- Mid-term / process / implementation evaluations
- Outcome evaluations
- Impact evaluations
- Data visualisation

Value Add

- Developing M&E frameworks for clients and workshoping it with implementation partners:
 - Theory of Change for intervention
 - Specified indicators to be used for monitoring
 - Specified timelines and questions for evaluation
 - Data collection tools
- Ongoing impact monitoring and reporting – quarterly / annual reporting
- Periodic evaluations to assess intervention design, implementation, outcomes or impact
- Longitudinal data collection and benchmarking
- Tracer studies for long-term follow-up of beneficiaries

“Creating Impact at Scale”
