

More than one in every three young people in South Africa are unemployed. The Youth Employment Service (Y.E.S) Initiative is a partnership vehicle between government and private sector to encourage workable solutions to the youth unemployment dilemma. The Y.E.S initiative is aimed to develop skills of young people, making them more employable and thus empowering them to become valuable economic contributors.

## Our Vision

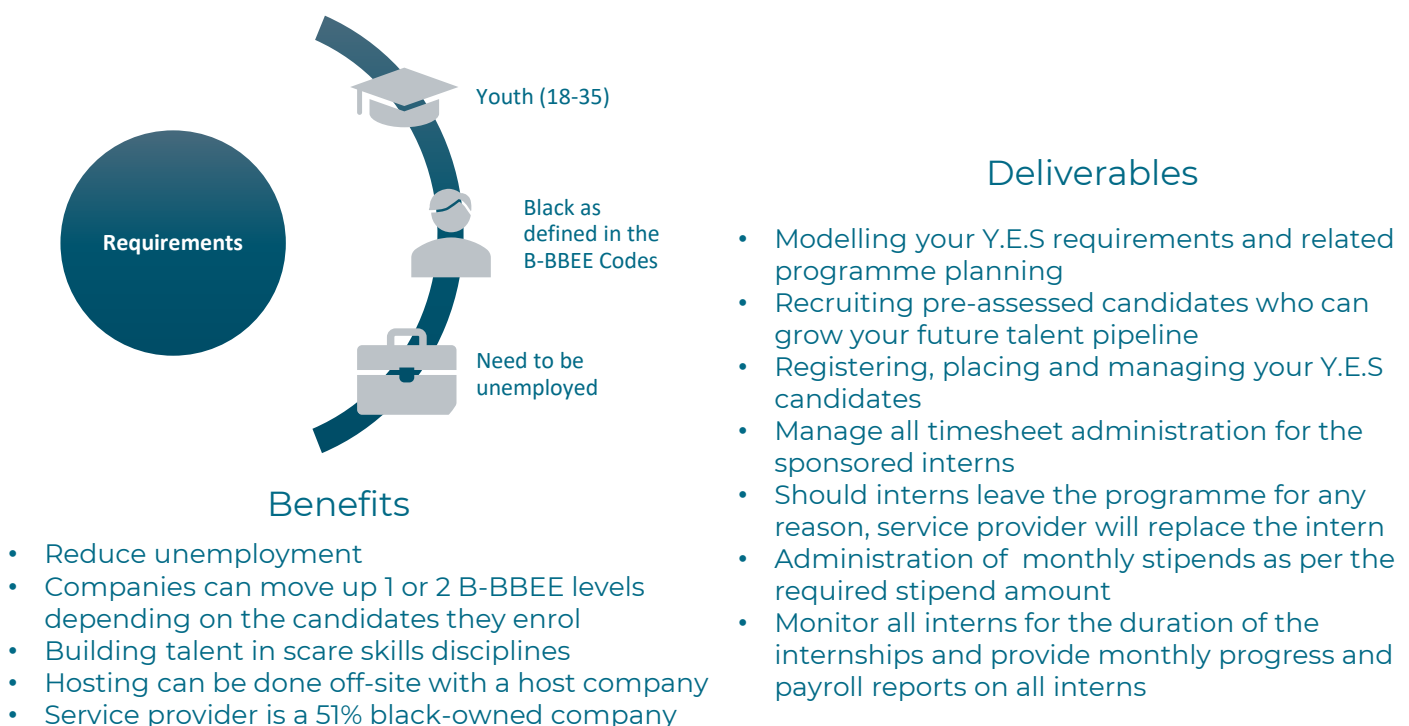

Through facilitating youth employment and Y.E.S Community Hubs, we aim to combat high youth unemployment, upskill workers, and make South Africa more attractive to investors. These efforts are aimed at boosting the South African economy.

## Client

Measured entities are able to claim up to two levels of enhanced B-BBEE status recognition if youth job creation targets are met.

## Our Approach

SolveSA have compiled a consultative process that includes compliance support. This process aligns to and enables the Y.E.S programmes to meet both Y.E.S and B-BBEE compliance requirements. SolveSA aims to contribute and enable sustainable youth employment by implementing best practices to achieving Y.E.S targets.

**SolveSA will provide an initial assessment to see if your company can qualify for the Y.E.S programme and will also present options which will allow for significant tax benefit claims.**
